

Store Profit Reconciliation Audit

Storefront orders placed on 17 August 2026 · Africa/Accra (GMT)

Store orders	Stores	Customer sales	Saved store profit	Correct store profit	Understatement
26	13	GHS 591.16	GHS 48.29	GHS 103.56	GHS 55.27

Independent formula: Correct store profit = customer selling amount – store base amount. The report deliberately ignores the saved *store_profit_amount* when recalculating. The saved value is shown only for comparison. The order-level *profit_amount_total* is system/platform profit and is reported separately.

Store-level summary

Audit notes

- Scope is limited to orders created from 00:00:00 through 23:59:59 on 17 August 2026, Africa/Accra (GMT).
- Only orders identified as storefront checkout orders were included.
- No existing calculated profit field was used to derive the correct profit.
- A missing saved profit field is treated as GHS 0.00 for variance analysis.
- Negative store profit is floored at GHS 0.00, matching the current Store Page implementation.
- This PDF is read-only evidence. It does not credit stores or modify orders, transactions, or balances.
